An Autonomous Institution of the University Grants Commission

राष्ट्रीय मूल्यांकन और प्रत्यायन परिषद
विश्वविद्यालय अनुदान आयोग का एक स्वायत्त संस्थान

BAOSI BANIKANTA KAKATI COLLEGE

**Nagaon, Barpeta
Assam – 781311 (INDIA)**

Dr. Pradip Das
Principal

Title of the Best Practice 1: Vermicomposting

Objectives of the Practice:

- To foster a sense of environmental responsibility and community engagement among students, faculty, and staff.
- To promote a sustainable waste management practice on campus.
- To provide students with practical experience and knowledge about sustainable agriculture, composting processes, and the role of worms in soil health.
- To produce high-quality compost that can be used to enhance the soil fertility of campus gardens and landscapes.

The Context:

BBK College is embarking on a vermicomposting initiative as part of its broader effort to promote eco-friendly practices on campus. The college, situated in a region with a rich agricultural heritage and a strong emphasis on environmental education, is ideally positioned to serve as a model for sustainable waste management.

The high-quality compost produced through this initiative will be utilized to enrich the soil of campus gardens, promoting healthier plant growth and a more aesthetically pleasing environment. This practice not only contributes to the ecological health of the campus but also demonstrates the practical benefits of composting to the broader college community.

By implementing vermicomposting, BBK College aims to foster a culture of environmental responsibility and sustainability among students, faculty, and staff. This initiative will serve as a tangible example of the college's dedication to reducing waste, conserving resources, and promoting sustainable practices, inspiring the entire campus community to adopt more environmentally conscious behaviors..

BAOSI BANIKANTA KAKATI COLLEGE

Nagaon, Barpeta
Assam – 781311 (INDIA)

Dr. Pradip Das
Principal

The Practice:

The Department of Zoology, recognizing the educational and environmental benefits of vermicomposting, took the lead in this project by inviting experts from the Agriculture Department of Barpeta District. These experts provided essential training to the students, equipping them with the knowledge and skills necessary to successfully manage and operate a vermicomposting unit. The training covered various aspects of vermicomposting, including the biology of composting worms, the process of organic waste decomposition, and the practical steps needed to maintain a composting system.

With the guidance and support from the agricultural experts, the Department of Zoology successfully set up a fully functional vermicomposting unit on the college premises. This unit processes organic waste generated by the campus, including kitchen scraps from the dining halls and green waste from campus gardens. The resulting compost is a nutrient-rich product that enhances soil fertility and supports healthy plant growth.

Evidence of Success:

Today, BBK College not only produces enough compost to meet the needs of its own gardens but has also extended its reach to the broader college community. The high-quality compost is made available for purchase by students, faculty, and staff for use in their home gardens. This initiative not only helps to reduce waste and promote sustainable practices but also engages the college community in environmental stewardship, fostering a culture of sustainability.

The vermicomposting project at BBK College exemplifies the institution's dedication to hands-on, experiential learning. Students gain practical experience in sustainable agriculture and waste management, enriching their academic experience and preparing them for future endeavors in environmental fields.

Dr. Pradip Das
Principal

The practice of vermicomposting at BBK College, led by the Department of Zoology with expert support from the Agriculture Department of Barpeta District, has become a cornerstone of the college's sustainability efforts. It not only addresses waste management challenges but also provides educational benefits and promotes environmental awareness within the college community. Through this initiative, BBK College is making significant strides towards a more sustainable and environmentally conscious future.

Problems Encountered and Resources Required:

- a) One of the primary challenges was the initial lack of knowledge and expertise in vermicomposting among students and faculty.
- b) Finding a reliable source for the specific types of worms required for efficient vermicomposting, such as *Eisenia fetida* (red wigglers), posed a challenge. In a rural setting, these worms were not readily available and had to be sourced from distant suppliers.
- c) Effective collection and segregation of organic waste from various sources on campus were initially problematic.
- d) Establishing a vermicomposting unit necessitated appropriate infrastructure, including space for the composting beds, shelter to protect the composting process from weather extremes, and adequate drainage systems. Finding and preparing a suitable location on campus presented logistical challenges.

Title of the Best Practice 2: Distance Education through KKHSOU Study Center

Krishna Kanta Handiqui State Open University (KKHSOU) is a state-run open university located in Guwahati, Assam, India. Established in 2006 and named after the renowned Sanskrit scholar Krishna Kanta Handiqui. It is dedicated to promoting education through flexible and distance learning modes. The university offers a wide range of undergraduate, postgraduate, diploma, and certificate programs across various disciplines to cater to learners from diverse backgrounds, including those who are unable to pursue conventional education.

Objectives of the Practice:

- To foster a sense of environmental responsibility and community engagement among students, faculty, and staff.
- To promote a sustainable waste management practice on campus.
- To provide students with practical experience and knowledge about sustainable agriculture, composting processes, and the role of worms in soil health.
- To produce high-quality compost that can be used to enhance the soil fertility of campus gardens and landscapes.

The Context:

Baosi Banikanta Kakati College introduced distance education programs under Krishna Kanta Handiqui State Open University (KKHSOU) in the academic session 2019-20 to expand access to higher education for students who face geographical, financial, or time constraints. Recognizing the growing demand for flexible learning opportunities, the college aimed to provide quality education beyond traditional classroom settings. The initiative aligns with the vision of KKHSOU to offer inclusive and learner-centric education, particularly benefiting working professionals, marginalized communities, and students unable to pursue regular courses.

BAOSI BANIKANTA KAKATI COLLEGE

Dr. Pradip Das
Principal

The Practice:

Baosi Banikanta Kakati College, as a study center of KKHSOU, ensures accessible and flexible learning through BA and MA programs since 2019-20. The college provides printed and digital study materials, weekend contact classes, and online resources. Continuous evaluation through assignments and exams keeps students engaged. Academic counseling, career guidance, and administrative support enhance the learning experience. With a focus on self-paced education, digital learning, and expert faculty support, the program empowers students to balance education with personal and professional commitments, fostering lifelong learning and academic excellence.
