Report on-
Plant and Nurture a Tree Campaign

A campaign to create awareness on the need to plant more trees for a better future was launched in virtual mode with the theme “Together, we can restore the earth” on the 25th of May, 2021. A flyer with the title “Plant and Nurture a Tree” was shared among students on whatsapp and facebook due to the pandemic. This was done with the objective to create awareness on environmental issues and the need to do our part in order to preserve nature.

The students were asked to plant a tree at home, take a selfie and send it to IQAC, BBK college. They were also asked to water the plants, take care of it and send another selfie with the plant in a month. The motto on the occasion was, “PROTECTING THE ENVIRNMENT STARTS AT HOME”

A number of students took part in the initiative quite willingly and sent photographs, some of which are attached herewith. Students of other institutions also took part in planting tree saplings.

The campaign brought a positive impact in the students and they resolved to continue with the good practice for days to come.
